Project Documentation: Internship Portal

Github Repo: https://github.com/jigarsiddhpura/Internship-Portal

Overview

The Internship Portal is a web application designed to connect students with internship opportunities. It allows students to search for internships, apply to them, and track their applications. Employers can post internship listings, review applications, and communicate with candidates.

Features

- Student Registration and Login: Students can register and log in to the portal to access internship listings and apply to them.
- Internship Search and Filtering: Students can search for internships using various filters such as location, industry, and job type.
- Application Submission: Students can submit their applications to the internships they are interested in.
- Application Tracking: Students can track the status of their applications.
- Employer Registration and Login: Employers can register and log in to the portal to post internship listings and review applications.
- Internship Posting: Employers can post internship listings with details such as job description, requirements, and application deadline.
- Application Review : Employers can review and manage applications submitted by students.
- Candidate Communication : Employers can communicate with candidates through the portal.

Technologies Used

- Front-end: HTML, CSS, JavaScript

Back-end : DjangoAuthentication : FirebaseDeployment : Heroku

Usage

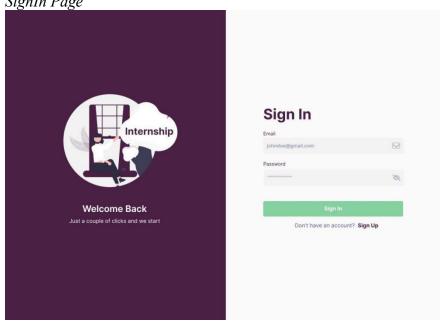

- 1. Student Registration and Login:
 - Register as a student by providing required information.
